

## **The ABCs of Putting Green Management**

Thomas A. Nikolai, Ph.D. & Michael Morris, CGCS

This three-week course weaves through the history of golf and maintenance practices that have led to our modern-day maintenance practices. It is filled with easy to interpret turfgrass research that supports or leads to questioning numerous cultural and mechanical practices and their impact on turfgrass agronomics. Topics covered include but are not limited to mowing, irrigation, fertilization, topdressing and rolling and proven method that can lead to economic savings with increased customer satisfaction.

### **WEEK 1: DEFINING THE PROBLEM AND OFFERING SOLUTIONS**

**Assessing putting surface expectations, putting green management, diminishing returns**

### **WEEK 2: MOWING, IRRIGATION AND FERTILITY**

**Mowing, brushing, grooming, irrigation, and fertility: Weekly Q&A Discussion**

### **WEEK 3: ROLLING**

**The latest research on lightweight rolling and closing thoughts**

GreenKeeper University courses generally consist of two hours of lecture content each week for students to view at their convenience and one weekly ZOOM discussion.

**THIS COURSE IS OFFERED FROM NOV 29 – DEC 17, 2021**
